

Customer Case Study - BigCorp (PDF)

Customer Case Study ? BigCorp Manufacturing

Company Profile

- Company: BigCorp Manufacturing Inc.
- Industry: Industrial Manufacturing
- Employees: 5,000+
- Location: Chicago, IL (headquarters), 12 factory sites across North America

Challenge

BigCorp had critical company knowledge scattered across SharePoint sites, shared drives, email threads, and individual laptops. Engineers spent an average of 2.5 hours per day searching for technical documentation, safety procedures, and compliance records.

Key pain points:

- Technical manuals were stored in 6 different systems with no unified search.
- Compliance documents were frequently outdated because version control was manual.
- New employees took 3-4 months to become productive due to difficulty finding information.

Solution

BigCorp deployed TechNova's Enterprise plan across all 12 sites. Implementation took 8 weeks and included:

1. Migration: 45,000 documents from 6 legacy systems into TechNova's unified platform.
2. Role-based access: Set up department-based permissions so factory floor workers, engineers, and management each see relevant documents.
3. AI-powered search: Employees can now ask questions in plain English and get instant answers with citations.

Results (After 6 Months)

Metric	Before	After	Improvement
--------	--------	-------	-------------

	-----	-----	-----
--	-------	-------	-------

Average search time per query	12 minutes	45 seconds	94% reduction
-------------------------------	------------	------------	---------------

Time spent searching per day	2.5 hours	20 minutes	87% reduction
------------------------------	-----------	------------	---------------

New employee onboarding time	3-4 months	6 weeks	50% faster
------------------------------	------------	---------	------------

Compliance audit preparation	3 weeks	2 days	90% faster
------------------------------	---------	--------	------------

Document duplication rate	35%	4%	89% reduction
---------------------------	-----	----	---------------

Testimonial

> "TechNova completely transformed how our teams access information. Our engineers can now find safety procedures in seconds instead of digging through SharePoint for 20 minutes. The ROI was clear within the first month."
